SSharp_Fix_Before.pdf (81 KB) SSharp_Fix_After.pdf (81 KB)

I compared those arcs, their aotclasses, and their mileages against the town highway map. Yes, they weren't coded correctly. (The centerline work in that area is sloppy too.)

I've changed the coding to match the town highway map more closely and fixed their alignment.

Johnathan,

I hope all is well.

I've got something I've noticed in the RDS data which I figured I would forward to you for your review/consideration.

A few years ago I noticed some AOTCLASS problems with certain arcs along South Hill Rd in Moretown. The problem is still present in the latest data. Not sure if you "guys" have had a chance to review it, but I believe the following arcs should have an AOTCLASS of 3.

FAID=500230600324
FAID=500230600325

These were both class 4 in the original RDS data.

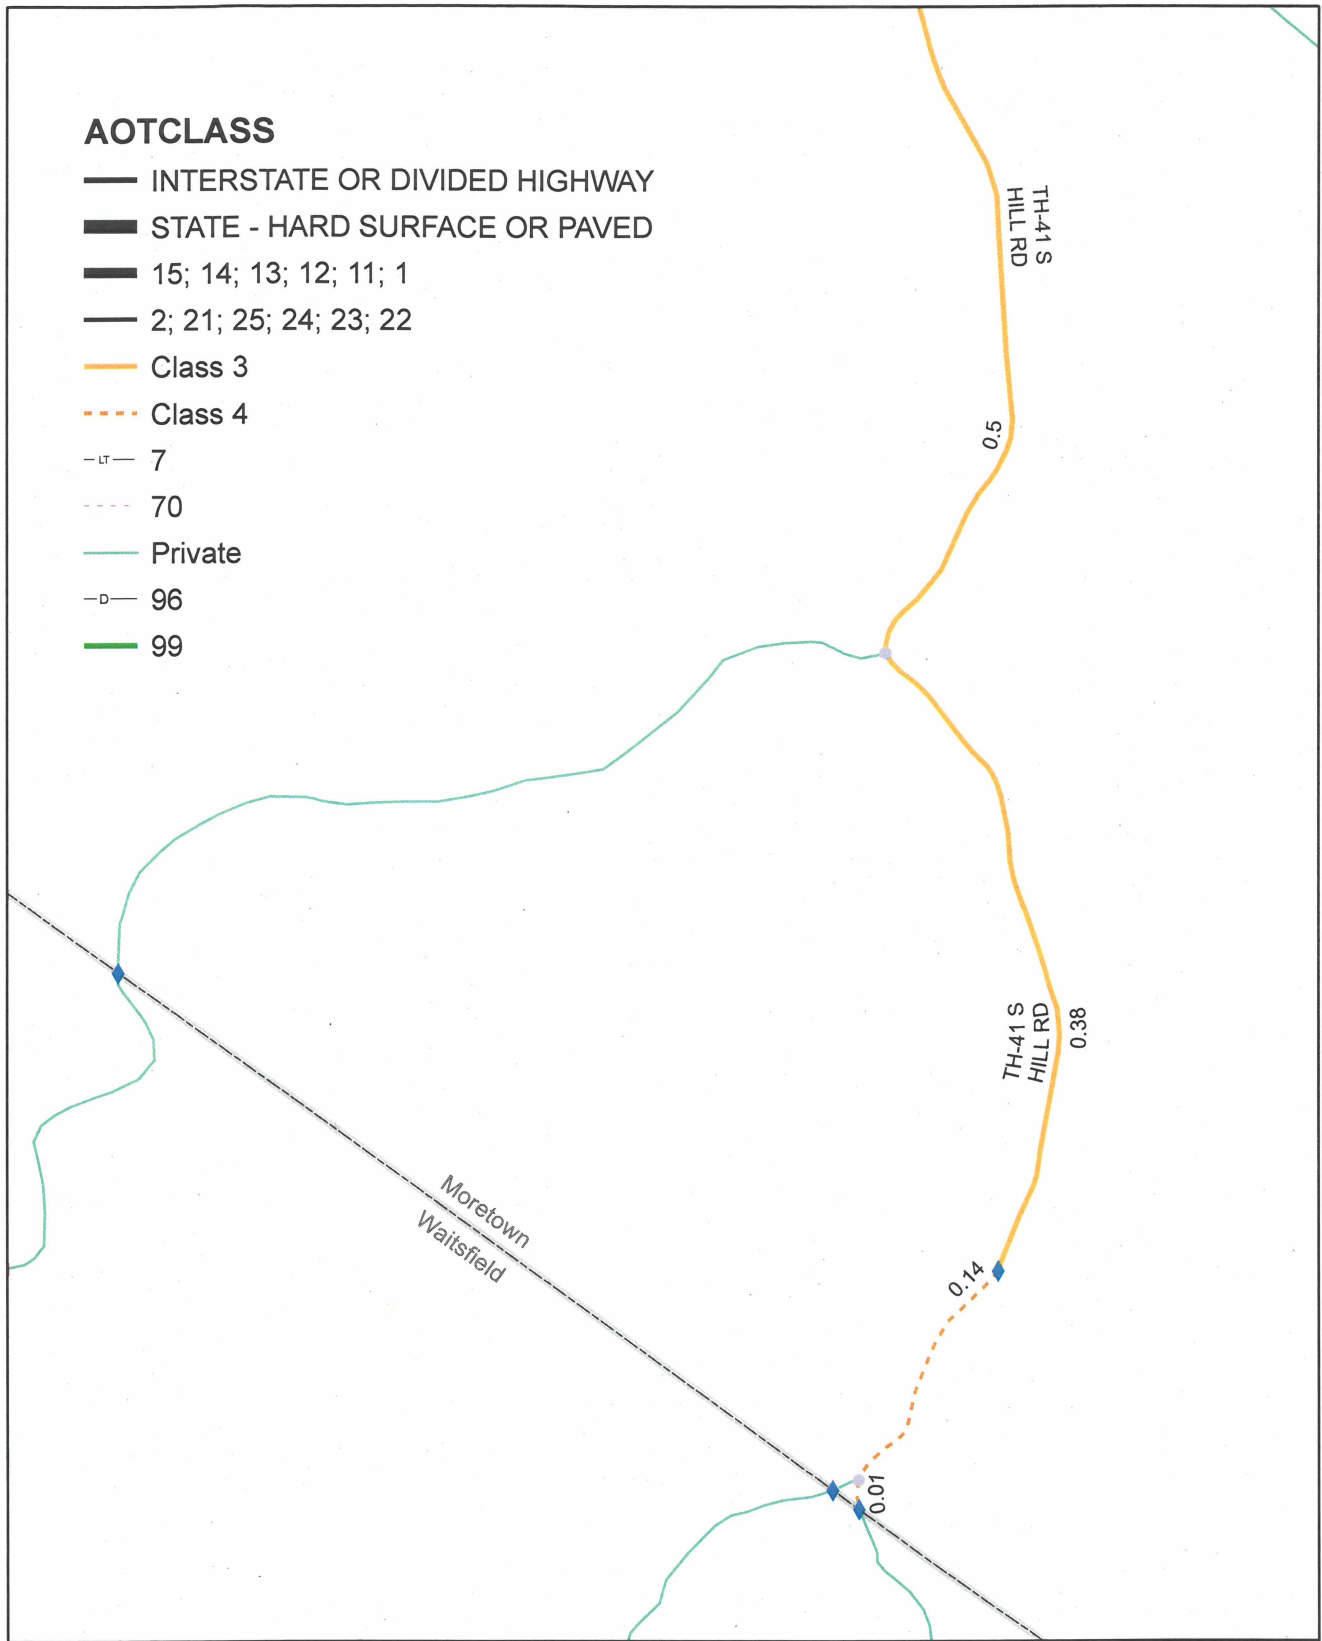

I believe 500230600322 reaffirms my contention (tagged as Class 4...floating in space). It is also consistent with how the road crew manages the road (grading, plowing, ditching, etc).
