ED. ROAD. STAFF LOCAL SHEET 101 AM
 EST. NO. 1793. 25' 25' 25' 25' 25' 25' 25' 25'
 1793 1790 2 36

Note:
 Sta 47+75 to Sta 49+50
 Shoulder to be widened on
 the right to help visibility

Note:
 The direction of haul with approximate excess cut or fill
 for the stations shown is shown on the plans. It is
 estimated that there will be approximately 4500 cu
 of excavation in the cut at Sta 93+ not required
 in the fill on the job and it is recommended that
 the excavation on this part of the project be left
 until the rest of the project is completed.

NOTE: Sufficient right of way to be obtained at this location to allow for the widening of the channel to conform to the extension to the right.

NOTE: This project is designed with the idea that the present bridge might be extended with stone masonry abutments and concrete slab, although this is merely an opinion of the engineer designing the job and not the bridge department.

Note: Old channel on the right from Sta 82+50 to 83+50 and on the left from Sta 84+00 to 84+50 is to be filled level with material obtained in excavating open channel. Estimated yardage of fill required is 750.

Note: The State shall place a 2' iron sleeve over the 8' lead pipes at Sta 84+20 and 85+25. This sleeve to cover the pipes inside the limits of the new fill.
