CONTROL OF ACCESS IS COMPLETE ON THIS SHEET

NOTE: The area under the structures from Sta. 1876+00 to Sta. 1884+00 is to be cleared and grubbed in accordance with the appropriate requirements set forth in paragraph 104.02, Construction Methods of the Specifications for Clearing & Grubbing, Item 104. This area shall be confined by the limits of the lines of fill slabs for Abutments #1 & #2. Thereafter and the T.O.W. limits to the right, all shall be considered subsidiary work to the Original Excavation, Item 104, in this area.
