

The Contractor will be required to move the stones in the present stone wall right of Sta 394+00 to Sta 397+00, back to a point just outside of the new fill or cut slopes, so that stones to remain the property of the owner.

NOTE: Since these plans were approved by the Public Roads Administration it has been necessary, in order to obtain right of way, to change the proposed side road approach from the location now shown on the plans to the old road location. Plans for this change will be furnished the engineer during construction.
