SHEET 1 OF

DIST. # 1 PLANS

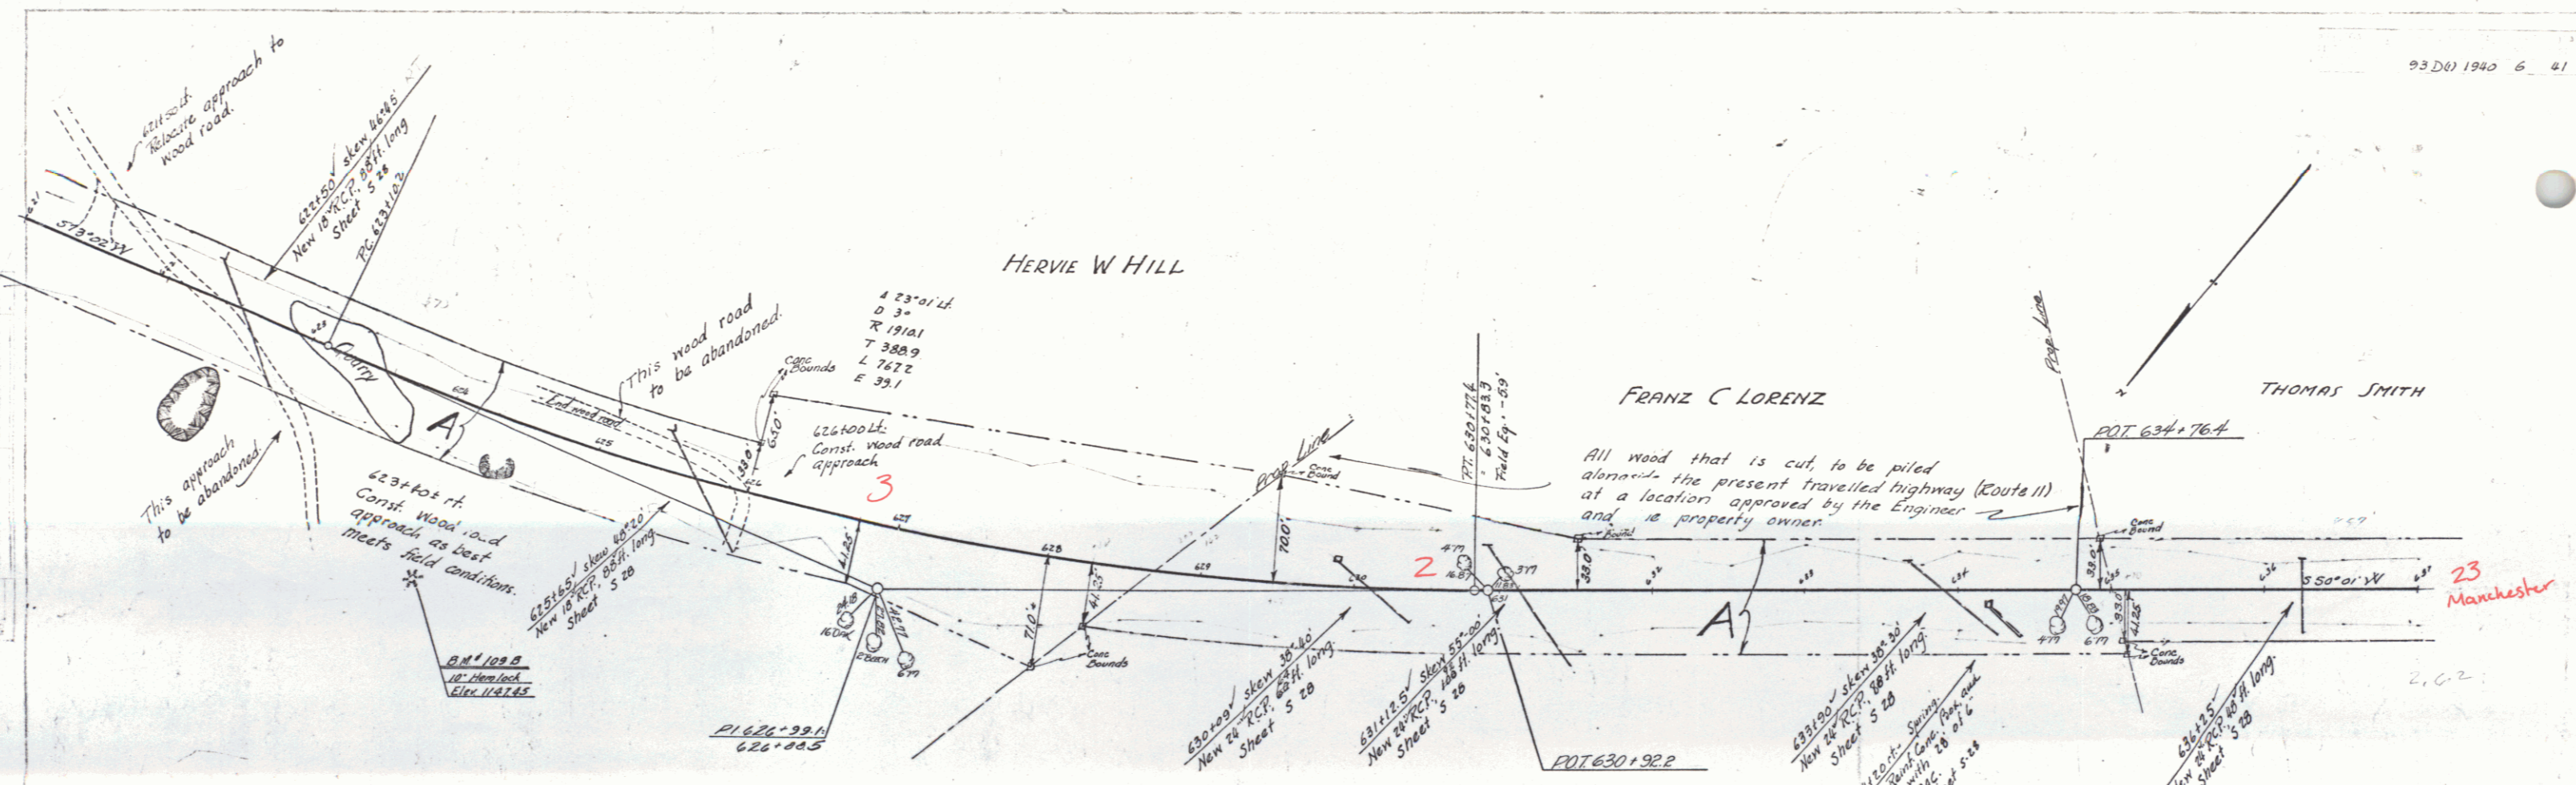

Note:
 STA 615+00 - STA 616+00
 Clearing & grubbing through this area
 shall be carried on in such a manner
 that trees & brush between top of
 roadway cut and interception ditch
 will be retained as a screen.

In accordance with this agreement between the
 State and the Manchester Water Company
 Inc. the contractor will be required to excavate
 under the direction of Agent of Manchester Water
 Company, Inc. a trench following the underground
 water course from the springs on the right of
 Station 618+00 southward to the limits of the
 right of way and place eighty-four (84) feet
 of 12" cast iron water pipe in this trench and
 satisfactorily backfill the same and the contractor
 will not be permitted to do any blasting
 during this work as it is necessary that the flow
 of water be maintained. The Manchester Water
 Company, Inc. will furnish and lay the 12" cast
 iron water pipe, the contractor to furnish such
 assistance as may be necessary in the actual
 placing of the pipe into the trench. Cost of
 pipe, including freight and storage, to be paid
 for by the State of Vermont.
 The elevation and exact location to which
 the pipe is to be laid is a field proposition
 to be determined as the trench is dug, the
 intent being to follow the present water
 course.
 Any construction of the inlet of the 12"
 cast iron pipe will be determined upon during
 actual construction operations and the length
 of pipe to be laid is approximately from right
 of way line to right of way line.
 All wood cut from this right of way to be cut
 to sled length, merchantable timber to 12"
 feet inches lengths, and piled off the right of
 way at a convenient place along the present
 traveled way, Route 11, for removal by owner.
