2090/2091 Optical Preemption Detectors STROBECOM II

2090-SD Detector

2091-SD Detector

The TOMAR 209X-SD Optical Preemption Detectors sense the optical pulses emitted by properly equipped emergency or transit vehicles. Mounted to observe the approaches of an intersection, 209X-SD Detectors are used with TOMAR 2000 Series Optical Signal Processors to inform the traffic control system of the presence of designated vehicles.

Using 209X-SD Detectors and STROBECOM II throughout your traffic control system reduces emergency response time, allows emergency vehicles to travel with greater safety, and improves transit vehicle timeliness.

TRUE 10 Year Warranty!

10 year warranty covers the 209x-SD and all STROBECOM II components. Unlike other manufacturers, TOMAR's ten year warranty has NO fees or charges for warranty repairs after five years.
