

AGENCY OF TRANSPORTATION
ENGINEERING
ROADWAY DESIGN SECTION

TO: Ron Gray, P.E., Finals Engineer, Construction Division
FROM: *Larry Wheeler*
Larry Wheeler, Project Supervisor, Design Section
DATE: September 9, 1996
SUBJECT: Springfield BRS RS 0113(8)

On August 20, 1996 I transferred the original plans, computation notebooks, etc. to Construction. A copy of this transmittal memo is attached for your referral.

At the Pre-Construction Conference for this project it was discovered that the number of shear connectors in the plans was incorrect (see attached memo dated August 29 to Jim Hoag) and three sheets have now been revised.

Attached are the originals of these three revised sheets for substitution in the original plans I brought up on August 20, 1996.

If I may be of further service, please give me a call at x3875.
