

SHORT-FORM SPECIFICATIONS

FACTORY-APPLIED METAL COATINGS

- A. Use the paragraphs on the following pages to specify hot-dip galvanizing and factory-applied metal coatings for your project. Typically these paragraphs would be inserted in the appropriate specification section, such as Section 02800 - Site Improvements, Section 05500 - Metal Fabrications or Section 05120 - Structural Steel.
- B. For complex projects, use Section 05080 - Factory-Applied Metal Coatings.
- C. Duncan Galvanizing provides a wide range of factory-applied metal coatings. Contact Duncan Galvanizing at 617-389-8440 for samples.

<u>Type of System</u>	<u>Trade Reference</u>
1. Hot-dip galvanizing	Duragalv®
2. Hot-dip galvanizing and factory-applied primer	Primergalv®
3. Hot-dip galvanizing and factory-applied architectural finish	Colorgalv®
4. Hot-dip galvanizing and factory-applied architectural finish with clearcoat	Colorgalv Clearcoat®
5. High-performance thermoplastic based coating for uncoated steel and aluminum	Duncan Thermoplex®
6. Hot-dip galvanizing and high-performance Thermoplex® thermoplastic based coating	Duncan Colorgalv
7. High-performance polyester based coating for uncoated steel and aluminum	Duncan Thermoset®
8. Hot-dip galvanizing and high-performance Thermoset® polyester based coating	Duncan Colorgalv
9. Hot-dip galvanizing, zinc polyester based tie-coat, and high-performance polyester based topcoat	Duncan Colorgalv Thermoset 5®
10. Hot-dip galvanizing, zinc polyester based tie-coat, polyester based color coat and high-performance clear topcoat	Duncan Colorgalv Thermoset 10®
11. Hot-dip galvanizing and high-performance fluoropolymer based coating	Duncan Colorgalv Thermoset 20®
