COBBLESTONE CASE STUDY

Redi-Rock Gravity Walls Level Lot for Custom Sports Court

The Challenge

When the owners of this Washington home wanted to install a tennis/basketball court, their hilly property presented some unique challenges. To create enough space for a court, they needed to contend with a 20-foot (6 meter) elevation change on the proposed site.

The Solution

Copper Creek Landscaping considered several options with the owners, including a poured-in-place wall. “But we just thought that would be too sterile and not aesthetically pleasing,” explained Matt Barton, owner of Copper Creek Landscaping.

He continued: “We wanted really straight, square walls though, so obviously a boulder retaining wall wouldn’t have worked. We had a lot of restrictions with what we were trying to do, and Redi-Rock was the perfect product that allowed us to do everything we needed to do.”

“The other options included a lot of engineering and expense. Having a pre-engineered system helped us a lot,” said owner Jeff Stockdale.

The biggest selling point of the Redi-Rock system was the ability to build retaining walls without requiring geogrid. After re-grading the area, the tallest wall required was still 11 feet (3.4

meters) and was installed as a gravity structure. This saved installers time because they did not have to excavate for geogrid, in turn saving the owners money. Plus, the aesthetic Cobblestone texture complimented the nearby home.

“We really liked the aesthetics of Redi-Rock because it blends in nicely with the surrounding terrain. We worked with Wilbert to do the custom work and they did a great job. We are really pleased with how it turned out—and we know it’s not going anywhere,” Stockdale said.

Project: Liberty Lake Sports Court **Customer:** Liberty Lake Residence **Block Manufacturer:** Wilbert Precast **Wall Installer:** Copper Creek Landscaping; Wilbert Precast **Location:** Liberty Lake, Washington **Completed:** 2010

Cobblestone Block Specifications

- Stacked stone texture
- Each block gives the appearance of 6 smaller blocks
- Four unique faces to give walls a random aesthetic
- Up to 23 square feet (2 square meters) of non-repeating texture available
- Wet-cast concrete gives a greater level of detail and durability

Contact your local Redi-Rock retailer or visit redi-rock.com to learn more about the Redi-Rock Cobblestone face today!
