09/04/2020

A photograph showing a vertical section of a concrete wall. The wall exhibits significant vertical staining, likely from water or moisture, with dark, irregular streaks running down the surface. The concrete appears aged and somewhat textured. At the top, there is a horizontal concrete ledge or beam. The date '09/04/2020' is printed in orange text at the bottom center of the image.

09/04/2020

A photograph showing a vertical crack in a concrete surface. The crack is filled with a dark, possibly black, material. The concrete is light-colored and shows signs of weathering and discoloration. A date stamp '09/04/2020' is visible in the bottom right corner of the image.
