COBURN BRIDGE

9'-0"

A photograph of a wooden bridge structure, likely a covered bridge, showing the interior wooden framework and a sign that reads "COBURN BRIDGE". The structure is made of dark, weathered wood. The sign is mounted on a horizontal beam in the upper part of the frame. The bridge's interior is supported by a complex network of wooden beams and trusses. The roof is made of wooden planks. The bridge extends into the distance, creating a perspective effect.
