A photograph showing a close-up view of a road surface. A prominent, irregular longitudinal crack runs down the center of the frame, separating two sections of asphalt. The asphalt is a dark grey color with visible aggregate. To the right of the crack, there are two parallel yellow lines painted on the road. In the foreground, a metal guardrail is visible, running diagonally from the bottom right towards the center. The guardrail is made of galvanized steel and is mounted on a concrete base. The background shows a concrete curb and some green vegetation. The date '07/15/2020' is printed in orange text at the bottom center of the image.
