

A photograph taken from a low angle looking up at a bridge structure. On the left, a large, weathered concrete pier supports the bridge. To the right, a large, dark steel beam runs diagonally across the frame. A bright rainbow reflection is visible on the upper surface of the steel beam. In the background, there are green trees and a clear sky. The date "10/01/2020" is printed in orange at the bottom center of the image.
