

**TAFTSVILLE
COVERED BRIDGE**

The Taftsville Covered Bridge is a
rare example of a covered bridge in
Vermont. It was built in 1872 by
Taftsville resident James Holmes. The
bridge is a fine example of the
and construction techniques of the
of New York and Ohio in 1872. It is
the oldest covered bridge in Vermont.
The bridge is 100 feet long and 12
feet wide. It is built of wood and
has a steep pitch of approximately
1 in 12. The bridge is supported by
concrete piers. The bridge is a
fine example of the construction
techniques of the late 19th century.
The bridge is a fine example of the
construction techniques of the late
