DO NOT OPERATE
CABINET WITHOUT
CONFLICT MONITOR UNIT

DANGER

115 VOLTS A.C.

Control panel with two vertical columns of switches and indicators. The left column has a 'MAIN ON' indicator and a 'OFF' button. The right column has an 'AUTO' indicator and a 'TEST' button. A black cylindrical light fixture is mounted to the left of the panel, with a flexible gooseneck and a black power cord connected to the panel's wiring.

A terminal block with eight screw terminals arranged in two rows of four. It is connected to various colored wires (red, blue, black, white) that are bundled together with a grey braided shielded cable.

A clear plastic protective cover for a printed circuit board (PCB). The PCB is populated with several integrated circuits, resistors, and other electronic components. A red wire is connected to one of the components on the board.

A rectangular metal mesh filter mounted in a wooden frame. The frame has '12x16x' printed on the sides. The filter is positioned at the bottom of the cabinet to provide ventilation.
