## TABLE OF APPROXIMATE DISTANCES IN VERMONT

To find distances between points listed in the table (as from Bellows Falls to St. Albans), find the first in alphabetical order (Bellows Falls) in the list and follow the vertical column to an intersection with the horizontal line from the second point (St. Albans) in the list (140 miles).

|        |       |               |         |        |             |       |        |                  |         |                |          |        |            |            |            |         |            |                   |         |            |                  |               |         |           |                |           |         |
