How Can I Get There?

In these days of fast changing conditions, it is often impossible to give satisfactory answers to travel inquiries. About the best that can be said is that our American people will willingly sacrifice to win the war and in their daily lives are as ingenious as in their war efforts—they will gain their objective. They will get needed relaxation from long hours of hard work in order to put forth greater effort as time goes on.
 Yes, it is possible to get around, but not as easily as in yesteryears. Vermont can be reached with limited gasoline and rubber but many will travel by rail and bus.

These are the printed schedules, subject to change of the railroads and larger bus lines. These may be consulted in connection with this map. Some smaller bus services are not on the schedules but a large number of the towns remote from through services can be reached by stage or star route carriers and taxi services. Many of the small carriers fit their schedules to those of the through routes but it is necessary to inquire locally about times of departures and rates. In most cases proprietors have arranged to meet guests at terminals within reasonable driving distance.

It seems that in addition to the advantages of scenery, outdoor sport and healthful living, there may be an element of adventure in business or vacation travel for the rest of the "duration." Country life will be more leisurely; there will be less rushing around and, as long as wheels turn, the way back home is open.

Use of Vital Transportation Wisely
