Montpelier, Vt. A top the Green Mountains, Vt. East Putney, Clyde Smith

Gen. Ellen, Tony Egan

For much of her 159 mile length, Vermont nestles serenely between the Connecticut River to the East and Lake Champlain to the West. But her soft wooded hills and rolling farmlands can be deceiving, for Vermont has strength.

And nowhere is that strength better exemplified than in the Green Mountain Range. Forming a virtually unbroken mountainous spine from Canada in the North to the Massachusetts border, the Green Mountains have become a winter and summer playground for travelers and native Vermonters alike. It is truly the backbone of Vermont.

Other lesser mountain ridges and monadnocks cover the length and breadth of America's 48th most populous state. Indeed, one quickly realizes that Vermont's charm and enduring magnetism is the happy result of her largely unsettled landscape, like a green jewel in the Atlantic Seaboard's crowded megalopolis.

In recent years, Vermonters have become aware of the importance of her natural beauty, not only as a major asset to the tourist industry, but as the supportive foundation to "the good life." Vermont is the first state to enact specific regulations controlling off-premise roadside advertising and it leads the country in forward-thinking environmental protection legislation.

There is much to be protected.

Nowhere in the world does Mother Nature's changing of the seasons arrive with more enthusiasm than in Vermont. Four times each year, the whirl of weather and new activities turns the minds and hearts of young and old.
